

VDL Containersystemen

Demountables

Strength through cooperation

VDL Containersystemen

EVERY COUNTRY IS DIFFERENT, AS IS EVERY CLIENT.

THAT'S WHY VDL CONTAINERSYSTEMEN MASTERS BOTH SERIES AND MADE-TO-MEASURE PRODUCTION. SPECIALLY DESIGNED BY OUR IN-HOUSE STRUCTURAL ENGINEERS TO MEET THE LEGAL REQUIREMENTS OF YOUR COUNTRY. THIS IS NORMAL OPERATING PRACTICE FOR US. JUST AS NATURAL AS THE HIGH QUALITY, SHORT DELIVERY TIMES AND RELIABILITY THAT HAVE MADE US ONE OF EUROPE'S LARGEST PLAYERS IN THE TRANSPORT SECTOR.

An ever-expanding number of clients are relying on VDL Containersystemen's complete product range, which includes hooklift systems, cable systems, skiploader systems, bodies and containertrailers. Whatever application you need, you can count on us to provide a solution that entirely meets your requirements.

INTERNAL ENGINEERING DEPARTMENT

The ability to listen is a distinctive quality of our technical team. They want clear insight into your needs, as well as knowledge of the conditions and regulations that play a role. We maintain up-to-date files for general information, but require you to specify your wishes and requirements. Together with our know-how, these form the basis for a made-to-measure solution. And our success in this approach is proven by the large number of clients with whom we maintain a longstanding relationship.

IN-HOUSE PRODUCTION

You don't just get a reputation, you have to earn it. We certainly deserve our reputation for reliability and safety by always delivering quality of the highest order. All critical components are therefore produced in-house by specialised welding, hydraulics and pneumatics departments, manned by qualified and experienced employees for whom perfection is the standard. For them, quality through product and process control forms both the start and end point for every product. Both our specialists and you benefit from the direct communication with the engineering department.

SHORT DELIVERY TIMES

A professional workforce and a flexible, efficient organisation result in delivery times that can compete with bulk production. Just take note of how soon you receive a calculation in response to your request for offer. That is representative of the pace that we maintain during the entire process. We can do this backed by the assurance that a large number of sister companies within the VDL Groep are specialised in metal processing, a relationship that guarantees competitive prices and high delivery reliability. The short delivery times are also the product of the flexible, no-nonsense culture within our organisation.

EXTENSIVE PRACTICAL EXPERIENCE

Designing and building systems is just one half of the challenge. The other is to deliver systems that operate perfectly. To ensure continuous practical feedback, VDL Containersystemen has its own assembly department, which serves a number of regional customers by assembling various systems, such as the combined crane and hook assembly. This keeps us up to date on the latest developments, while at the same time expanding the expertise and experience required to continue delivering the customised products that you can put to immediate use.

RELIABLE PARTNER

Investments in the transport sector are generally of a long-term nature. That makes it good to know that VDL Containersystemen is a solid company within a successful group. Because it gives you, the client, the assurance that your components will remain available in the future and that you can count on a strong party for service and maintenance. A party with an effective dealer network in Europe, one that guarantees good accessibility and fast response times.

COMPLETE PRODUCT RANGE

- Hooklift systems
(Sliding system and Sliding-Tilting system)
- Cable systems
- Skiploader systems
- Standard- and Special Bodies
- Container trailers

PROFILE

- Market leader in the Netherlands and Belgium
- Leading player in Europe
- Extensive practical experience
- Expert consultancy
- Proven quality
- High reliability
- Short delivery times
- R&D in house/ engineering department
- Welding section
- Section pneumatics
- Section hydraulics
- Assembly department with E4 compliance statement
- Geared customer-specific deliveries
- Repair & maintenance department
- After sales & spare parts department with 24-hour service
- Optimum warehouse control
- Excellent dealership reputation

VDL Groep

VDL Containersystemen is part of VDL Groep, an international industrial family-owned company with 81 operating companies, spread over 18 countries and with more than 9,100 employees. It is a conglomerate of flexible, independent companies, each with its own specialty. The strength of VDL Groep lies in the mutual cooperation between the companies.

VDL Containersystemen operates in the finished products division. This division comprises suspension systems for the automotive industry, heating, cooling and air-technical systems, systems for the oil, production automation systems, gas and petrochemical industry, systems for the agricultural sector, sunbeds, roof boxes, container handling equipment, cigar-making and packaging machines, components for bulkhandling and dust extraction installations and systems for explosion and fire protection.

The other divisions are subcontracting, car assembly and buses & coaches. In subcontracting, VDL specialises in metalworking, mechatronic systems and system supply, plastics processing and surface treatment. The car assembly division includes the production of passenger cars for third parties. The bus & coach division includes chassis & chassis modules, coaches, public transport buses, mini & midi buses, special projects and second-hand buses.
